Introduction

Superpit Machinery was founded in 2023 and registered under the laws of Zimbabwe in accordance with the then Companies Act Chapter 24:03, now Companies and other Business Entities Act 24:31. The company originally registered as **Magna Trading Pvt Ltd**, in 2018 and is now trading as **Superpit Machinery**. The company is dedicated to providing high quality professional drilling and exploration services within Zimbabwe and Zambia, as well as expand to other countries within the SADC region.

We operate throughout Zimbabwe with a nationwide client base comprising mining companies as well as specialist construction and earth-moving contractors, government institutions and individuals.

We own a fleet of drill rigs and air compressors as well as selling drilling accessories. Our services include Blast hole drilling and blasting, borehole drilling, Core drilling, exploration, rock-breaking and air compressor hire.

The key motivation within the Superpit Machinery team is to provide an unrivalled level of service to Clients delivering all their needs in a timely, professional and cost effective manner.

Mission and Vision

Vision

To become a reputable one-stop center for all drilling and earthmoving machinery.

Mission

The company is committed to delivering top-notch professional drilling and exploration services in Zimbabwe.

With a focus on reliability, efficiency, and customer satisfaction, we strive to be your trusted partner in achieving your project goals. With a commitment to excellence and a dedication to continuous improvement, we are on a mission to become the leading one-stop center for all your drilling and earth-moving machinery needs. Trust us to deliver the equipment you need, when you need it, so you can focus on completing your projects successfully.

Some Specific Services

Blast Hole Drilling

BoreHole Drilling

Spare parts and accessories

Specialist Equipment Hire

Blast-hole Drilling Services

Our blast-hole drilling services extend up to a depth of 64 meters, utilizing track-mounted or crawler drilling rigs. The drilling diameters range from 90mm to 165mm and are mainly conducted in open pit or surface mines.

We offer blast-hole drilling services for a variety of materials including:

- Coal
- Aggregate quarry stones
- Dolomite
- Gold
- Chrome
- Limestone
- Lithium

Borehole Drilling

Drilling boreholes is mainly done to extract water. In Zimbabwe, boreholes have emerged as the most reliable source of sustainable water. Our borehole drilling rigs are mounted on trucks, enabling access to various locations across Zimbabwe. Capable of drilling up to 250 meters deep, the casing used depends on the ground formation.

Boreholes can be fitted with submersible pumps (electric or solar) or bush pumps (manual). Our borehole drilling services cover a wide range of clients in Zimbabwe, including individuals, farmers, private organizations, schools, and local government authorities.

Specialist Equipment Hire

The company operates a fleet of both 10-Bar and 14-Bar air compressors that perfectly complement our drilling rigs. These machines require towing on-site, and a detailed specification for our available compressors for hire can be provided upon request.
